Mock Auth API

Products API

Categories API

On this page

Get Categories

Pagination

Search

All API routes are protected and require authentication. You must include a valid JWT token in the request headers as `Authorization: Bearer <your_jwt_token>` and JSON body. `multipart/form-data` is not supported. Set `Content-Type: application/json`.

Get Categories

Request

You can access the list of categories by using the `/categories` endpoint.

Copy

```
[GET] https://api.bitechx.com/categories
```

Response

Copy

```
[
  {
    "id" : "9c1129eb-cb7f-4c34-a94e-193a40f37a87",
    "name" : "Clothes",
    "description" : null,
    "image" : "https://i.imgur.com/Qkla5tT.jpeg",
    "createdAt" : "2025-09-30T11:07:09.824206+00:00"
  }
]
```

Pagination

Request

You can paginate categories by adding the `offset` and `limit` as query parameters.

Copy

```
[GET] https://api.bitechx.com/categories?offset=5&limit=10
```

Search category by name

Request

You can search for a category by using the `/search` endpoint with `searchedText` query parameter.

Copy

```
[GET] https://api.bitechx.com/categories/search?searchedText=cloth
```

Response

Copy

```
[
  {
    "id" : "9c1129eb-cb7f-4c34-a94e-193a40f37a87",
    "name" : "Clothes",
    "description" : null,
    "image" : "https://i.imgur.com/Qkla5tT.jpeg",
    "createdAt" : "2025-09-30T11:07:09.824206+00:00"
  }
]
```
